Dual-Circuit Power Distribution Unit, 30-Amp

FEATURES

- Designed for use in cabinets and enclosures.
- Provides 24 receptacles in two banks of 12.
- Each circuit is independent—when one circuit is overloaded, the other still gets power.
- Two UL® 489 listed 15-amp circuit breakers are on the front for easy reset.
- The 30-amp capacity enables you to safely draw twice as much power as you would with a standard 15-amp power strip.
- Meets UL® 60950-1 1st Edition and ITE standards.
- Receptacle banks are clearly labeled.
- Built-in T-slot mounting rail for easy installation.
- Slim profile for installation in tight corners.
- Aluminum housing.
